AI-Powered FAQ Chatbot ☺

Ask me anything from the knowledge base powered by Azure Cognitive Search + Azure OpenAI.

Your Question:

what is computer vision?

Get Answer

Answer:

Computer vision is a technology that extracts information from images, such as detecting objects, describing images, and recognizing text through OCR (Optical Character Recognition).

Context Retrieved:

1. Computer Vision extracts information from images, including object detection, image description, and OCR capabilities.
2. Text Analytics is a Cognitive Service that provides sentiment analysis, key phrase extraction, language detection, and named entity recognition.
3. Azure Cognitive Search is a cloud search service that provides indexing, querying, and AI-powered search capabilities for structured and unstructured data.

The screenshot shows a web-based AI-powered FAQ chatbot interface. At the top, there is a header bar with the URL "localhost:8501". Below the header, a navigation bar includes links for Microsoft Certified..., ChatGPT, AI Services | Micros..., AI Courses & Certifi..., Machine Learning C..., GUVI, and Partial Derivatives. The main content area features a large heading "AI-Powered FAQ Chatbot" with a smiley face icon. Below the heading, a subtext says "Ask me anything from the knowledge base powered by Azure Cognitive Search + Azure OpenAI.". A text input field labeled "Your Question:" contains the text "latest movies". A red button labeled "Get Answer" with a magnifying glass icon is positioned below the input field. A pink message box at the bottom states "No results found in the knowledge base." with a red X icon.
